Beth:

See the veolia samples. I converted the Specific Gravity to (lbs/gal) to help us maximize the load on the transfer but I don't know what the veolia samples go with which vac box. Can you help with this. See my modified version of the sample analysis.

I would like a spread sheet that shows this information on it for Monday.

Remember, the weight of the Dynamic boxes is 11,300 pounds.

Thanks

Gary Moore
